2019 - 2021

Proudly holding an M.Sc. in Computer Science from Mahatma Gandhi University, achieved with distinction in July 2021 with a commendable grade of B+ (78%).

Bachelor Degree of Computer Science

2016 - 2019

An accomplished B.Sc. Computer Science graduate from Mahatma Gandhi University, earning a degree with merit in April 2019, accompanied by a commendable grade of B (75%)

PROJECTS

1. A3SOLA

Technologies: Python, Frappe and MariaDB

Developed a complete ERP software solution for solar company, supporting modules for CRM, stock management, HR, support services, and project management. Enhanced operational efficiency across multiple departments through integrated workflows.

2. DEX

Technologies Used: Python, Django, Django REST Framework and PostgreSQL

Built an investment and loan management system enabling user registration, investor verification, and automated credit allocation. The system supports daily transaction tracking, settlement management, and end-to-end loan lifecycle monitoring.

3. SPREE

Technologies Used: Python, Django, Django REST Framework and Mysql

Created a financial accounting solution focused on simplifying financial processes. Integrated core accounting modules with additional business services to support small and mid-sized organizations.

4. Geopic

Technologies Used: Python, Django, Django REST Framework and PostgreSQL

Developed a mobile application for Arab Elite Citizens enabling users to upload various types of documents, share them with friends, tag others, and comment on posts. Designed to enhance social interaction around document sharing.

5. Face Recognition Sysem

Technologies Used: Python, Flask and Mysql

Implemented a face recognition system using libraries like face_recognition and OpenCV. Enabled identity verification and detection functionalities with high accuracy.
